Sign language is used by people who cannot hear or speak well. They use their hands instead of their voices to talk.

Their hand signals may be different letters, words or whole ideas. Sign language is used by other people too.

Basketball referees, for example, use hand signals to let people know what has happened in the game. Their signs can mean 'foul,' 'time out,' or can let players know when a play was good. Guess who else uses sign language? You do!

You wave your hand for hello and goodbye. You nod your head up and down to say yes and back and forth to say no.

You point to show which way to go. Sign language is used by people everywhere as another way of talking.

76. What is the main idea of this passage?

1. Sign language is important to many sports.
2. Sign language is used by people everywhere.
3. Sign language is used by deaf people in some areas.
4. Sign language is used by some people in some countries.

Many species of bats have very small eyes and do not see well. Still, they can fly around, and hunt for food in the dark without bumping into any objects. How is this possible?

Echolocation!

You might recognize the beginning of the word echolocation as echo, and you might recognize the last part of the word as location. This gives you clues about how echolocation works.

The bat sends out sounds using its mouth or nose. The sounds bounce off objects and return to the bat. Echolocation not only tells the bat that the objects are nearby, it also tells the bat just how far away the objects are, and what they look like – be its size, shape and even texture.

Bats are not the only creatures that use echolocation, porpoises and some types of whales and birds use it as well. It is a very useful tool for the animals that use it.

82. What is the main idea of this passage?

1. Bats cannot see very well.
2. Many animals use echolocation.
3. Bats are not the only creatures that use echolocation.
4. Echolocation is a useful tool for bats and other animals.

83. What does the word 'they' (line 8) refer to?

1. the clues 2. the objects 3. the sounds 4. the creatures

84. Which statement is NOT true?

1. Echolocation is a very useless tool for a bat.
2. Echolocation helps a bat hunt for food in dark.
3. Echolocation tells a bat what an object looks like.
4. Echolocation tells a bat how far away an object is.

Ice Cream

(1) Ice cream is one of the most popular desserts in the world. Over four billion gallons (15.1 billion liters) are consumed each year, worldwide. Although many people enjoy this frozen dessert, not too many people know its history.

(2) Eating frozen sweets started about two thousand years ago. In ancient Italy, Persia and China, ice (or sometimes snow) was mixed with fruit or fruit juice. In ancient Rome, the Emperor Nero had snow brought down from the mountains and mixed with fruit.

(3) Arabs were the first people to add milk to frozen desserts. Instead of fruit juice, they added sugar as a sweetener. But sugar wasn't the only thing added. They also added dried fruits and nuts. As early as 1,000 years ago ice cream could be found in Baghdad, Damascus and Cairo.

(4) Much later, in the sixteenth century, the rulers of ancient India used horsemen to bring ice down from the mountains to make sorbets. During this time a famous Italian duchess, Catherine de Medici brought ice cream to France. A hundred years later, in the seventeenth century, ice cream could be found in England.

(5) After this time, ice cream and ice cream recipes were mentioned in books. One of the earliest ice cream recipes appeared in a cookbook from 1718. The Oxford English Dictionary claims that the first mention of the phrase "ice cream" was in a magazine that was published in the year 1744.

(6) About one hundred years later, in the 1870's, a German engineer invented something that would later help make ice cream available worldwide. This invention was the freezer. Later still, in 1926, an improved a method of freezing was invented. This is when

ice cream started to spread all over the world because it could be more easily made and transported.

(7) These days there are many companies that sell ice cream and the number of different flavors available is well over 1,000. Frozen desserts have been around for a long time and will most likely be enjoyed well into the future.

85. What should be the best title of this passage?
