

Reading 1:

Marcia says that all of her friends have a cell phone, but Marcia’s mom doesn't want to buy her one. She doesn't want Marcia to play video games either. What is more, the Internet scares her. Marcia's mom says, “If Marcia has a cell phone, how do we know whom she is talking to? Video games are bad for you. The Internet is dangerous and uncontrolle4. It’s like having a gun in the house. We should just ban her from using the computer, and I'm not buying her a cell phone until she is 18. This is the only way we can be sure that Marcia is safe.”

Maecis’s dad disagrees with her. Although he agrees that there are some dangers to it, he likes the Internet, and finds it to be very useful. “The trouble is,” he says, “we just can’t stop Marcia from using the Internet, as this would put her at a disadvantage. In addition, I like video games. I think that, when played in moderation, they are fun. Obviously, it is not good to play them without restraint or self-control. Finally, I think Marcia needs a cell phone. We can’t take these things away.”

Reading 2 :

Pollution is the degradation of the natural environment by external substances introduced into it directly or indirectly. Pollution occurs when ecosystems cannot get rid of substances introduced into the environment and the balance of the ecosystem is broken.

The sources of pollution are numerous. They can come from natural disasters or the results of human activities, such as oil spills, chemical spills, and nuclear accidents. These can have terrible consequences on people and the planet: destruction of the biodiversity, increased mortality of human and animal species, destruction of natural habitat, damage caused to the quality of soil, water and air.

The application of the principles of sustainable development is necessary for preventing pollution and protecting the environment. This means that we should remedy existing pollution, but also anticipate and prevent future pollution sources in order to protect the environment and public health. Any environmental damage must be punishable by law, and polluters should pay compensation for the damage caused to the environment.
